

Construction Site

Security Services & High-Speed WiFi

**HD Camera
Surveillance**

**True Internet
Broadband**

Protect expensive equipment and materials and improve worker safety with a durable video surveillance system.

Jobsite material theft cost contractors over \$1 billion a year and rising.

Video Surveillance for Construction Sites

Construction Sites are the perfect environment for video surveillance, both because of the value of the inventory and its susceptibility to theft. Jobsite material theft cost contractors over \$1 billion a year. Construction sites also leave a large majority of their inventory on site 24 hours a day leaving it exposed to theft and damage.

Protect Property & Workers

Surveillance cameras can help by keeping your security staff posted about any security issues that arise throughout the day. Modern security cameras allow staff to be more flexible in their duties with features like video alerts and mobile viewing. Instead of sitting in front of a monitor all day, security guards can actively patrol your grounds and receive alerts from cameras.

Here are some of the many benefits of video surveillance for your construction company:

- **Theft prevention made easy**
- **Keep out petty criminals and intruders**
- **Ensure a safe working space for employees**
- **Monitor construction process to increase efficiency**
- **Check up on your construction site from your smart phone**
- **Prevent liability suits**

SkyFidelity utilizes a unique combination of tools to provide a custom surveillance solution that's right for your construction site. From the initial site security audit to wireless network design and virtual security integration of your new system, we are there with you the entire way to ensure a smooth installation.
