Wireless Early Warning Systems: WEWS

The most efficient way to warn the public to prevent incidents

With increased personal protection for beach goers and decreased liability for the cities operating the beaches, the WEWS represent a major advance in warning systems for the lifeguards operation. Recorded and stored video surveillance, protect the property of the public at the beaches from the latest trend of thieves running away with towels containing the personal values of people enjoying the water.

Provide instant weather warnings to the public before it is too late, storms can approach beaches and be above the public in minutes threatening the citizen's safety.

The most reliable way of finding missing children at the beach, with the public announcement system (PA), lifeguards can have everyone at the beach looking for the missing child, increasing the amount of eyes exponentially.

This is the best method to get people out of the water in emergency.

Wi-Gate 300-8-8-o Outdoor Access Point

The Most Powerful, Durable and Reliable Marina Wi-Fi Systems

With a 1/4 mile radius Wi-Fi signal range, a Pentium 4 class processor and up to 200 simultaneous user connections, the Wi-Gate Marina access point (AP) gives the coverage and reliable connectivity that boaters want and marinas need.

Designed to last, our robust wireless technology is safeguarded inside our patented hermetic seal enclosure that is NEMA 3, 3R, 4, 4X, 12, & 13 certified. This makes each AP capable of withstanding years of tropical weather conditions and corrosive salt water.

See for yourself the durability of our access points. Watch as we open a unit at Deering Bay Marina in Coconut Grove Florida where it has been operational since 2005. <http://goo.gl/BThVAJ>

SkyFidelity Satellite Internet Service Plans

Companies need a communication plan with unmatched reliability. They need a powerful network with the ability to support a wide range of applications for communications, from VoIP and satellite Internet VPN to streaming data and video. They need broadband satellite Internet from SkyFidelity included in their communication plan.
